

Longevity and health

A – age, D – disability, E – ethnicity, G – gender, O – sexual orientation, R – religion/belief, S – socio-economic status

| Key indicators in National Indicator Set for equality in 'longevity and health' | Source proposed | Equality characteristics collected in these sources |
|--|---|---|
| 119 Self-reported health and wellbeing 137 Health life expectancy at age 65 140 Fair treatment by local services | Place survey (local authorities) | A, D, E, G, O, R, S planned, although analysis by disaggregated groups other than gender is unlikely to be possible. |
| 120 All age, all cause mortality rate | Death registrations (General Registry Office – part of the Home Office) | S |
| 123 16+ smoking rate | NHS administrative data from Stop Smoking Service (Information Centre for Health and Social Care ICHSC) | A, E, G or geographic area. |
| 112 <18 Conception rates | Birth registrations | Place of birth of mother. |
| 53 Prevalence of breastfeeding at 6-8 weeks | Primary care trust (PCT) records | No equality disaggregation in publication. |
| 55 Obesity in reception year. 56 Obesity in Year 6 | For obesity data collected as part of the National Child Measurement Programme | E was optional in 2006/07. Postcode of school is also recorded so free school meals (FSM) rates can also be used. |
| 8 Adult participation in sport | Sport England's Active People Survey | A, D, E, G, S a mapping tool is available. |
| 124 Long-term condition – independent and in control | PCT patient survey (Healthcare Commission) | A, D, E, G plus age leaving full-time education. |
| 126 Access to maternity services | Hospital episode statistics (HES) (ICHSC) | A |
| 57 Children's participation in sport | School sport survey (Department for Children, Schools and Families DCSF) | By school. FSM, ethnic minority and special educational needs (SEN) proportions. |

Longevity and health

A – age, D – disability, E – ethnicity, G – gender, O – sexual orientation, R – religion/belief, S – socio-economic status

| Key national level sources | Key indicators and information on equality characteristics | Notes |
|---|---|---|
| Mortality statistics in combination with Integrated Household Survey (Office of National Statistics ONS/General Register Office GRO) | Infant mortality rates G, E, S Life expectancy at birth G Teenage conceptions Health expectancies (including healthy life expectancy and disability-free life expectancy) G | Place of birth of mother is collected, rather than ethnicity. |
| Integrated Household Survey (IHS) (ONS) | Self-reported limiting longstanding illness Self-reported general health status Smoking prevalence (all A, D,G, R, E, S) | |
| Health Survey for England (ICHSC) | Self-reported longstanding limiting illness Self reported general health status Obesity prevalence Smoking prevalence Mental wellbeing scale* (all A, E, G, S) | Annual – one year after time period. |
| Q research (using data from 500 GP practices) | Vascular risk score A, E, G, S | To become quarterly. PCT level. |
| Infant feeding survey (ICHSC) | Breastfeeding (continuation/initiation) A, S (and mother's country of birth) | One year after time period. |
| Hospital episode statistics (HES) (ICHSC) | Women who have seen a midwife or appropriate healthcare professional by 12 weeks A, E | Within 3-6 months of reporting period. PCT level. |
| Referrals, assessments and packages of care data (Commission for Social Care Inspection CSCI) | Achieving independence | A new measure, characteristics unknown at present. |
| National Child Measurement Programme (Dept of Health DH) | Obesity at school reception age and Year 6 E (optional) | Location also recorded so links with deprivation can be made. |
